

Your way to the leader in the German market for information concerning fire prevention

Brief description

Preventive fire protection is a planning job that requires a lot of technical know-how. The **FeuerTRUTZ Journal** offers expert knowledge, practical tips and empirical data from renowned fire safety experts. It addresses professional planners and authorized experts and provides information about all areas: building construction, fire safety systems and management of fire prevention. It is characterized by competence and neutral reporting. The articles present attempts at solutions to conflicts and help the reader to avoid planning and implementation mistakes. Furthermore it delivers an overview about new laws as well as regulations and directives. Illustrations, info boxes and checklists supplement the reader's understanding. The FeuerTRUTZ Journal is available both in printed form and as a digital app or desktop version.

Frequency

6 issues per year
published bimonthly
